About Us

Specific Fire Protection Limited is dedicated to revolutionizing fire safety across India. With a mission to make every building a bastion of security, our seasoned team brings over five years of collective expertise to the forefront. We prioritize the well-being of our clients, adhering to stringent safety protocols and fostering a culture where safety is paramount.

Our journey began with a powerful ethos: **"Let's Make Fire Safe India."** We deliver reliable fire safety solutions where safety is our priority, and we adhere to stringent protocols to ensure the well-being of our clients. Continuous improvement is our mantra, as we strive to raise the bar for fire safety through innovation. Join us in our commitment to elevate safety standards nationwide — building a safer, more secure future for India.

“ **EMPOWERING SAFETY,
ENRICHING LIVES.** ”

Our Vision

COMMITMENT TO SAFETY

At Specific Fire Protection Limited, safety isn't just a goal; it's a fundamental right. We're committed to ensuring that everyone has access to top-tier safety solutions. Our dedication to excellence means we go above and beyond industry standards, offering products and services that prioritize both affordability and quality.

Through ongoing innovation and research, we're constantly improving our offerings to provide the most effective protection against fire hazards. With our tagline **"Let's Make Fire Safe India,"** we're on a collective mission to build a safer, more secure future — step by step, alongside our customers, partners, and stakeholders.

Our Services

FIRE DESIGN

We prioritize fire safety in building design. Our experts seamlessly integrate fire safety measures without compromising aesthetics or functionality — tailoring strategies to each building's unique layout, materials, and occupancy. Our approach encompasses passive measures like fire-resistant materials and active systems such as alarms and sprinklers.

FIRE HYDRANT SYSTEM

An essential component of any fire protection plan, designed to provide a reliable and easily accessible water supply for firefighting operations. We ensure fire hydrant systems are properly designed, installed and maintained — helping communities enhance their resilience to fire emergencies in both urban and rural areas.

FIRE ALARM SYSTEM

Vital systems meticulously crafted to swiftly detect and signal fire emergencies. Comprising devices and control panels, they function cohesively to offer timely alerts — early detection and warning crucial for minimizing casualties by prompting swift evacuation, and aiding emergency responders in rapid intervention.

FIRE RATED DOOR

Special doors that stop the spread of fire and smoke for a set amount of time — protecting people and property during a fire emergency. Made with special materials that resist fire and smoke, they help contain fires, reduce damage to property, protect valuable assets and, most importantly, save lives.

FIRE SUPPRESSION SYSTEMS

Systems that swiftly detect, control, and extinguish fires within buildings and enclosed spaces. Various types — including water-based, gaseous, foam, and dry chemical systems — target diverse fire hazards, halting fire spread, mitigating property damage, and safeguarding occupants.

AMC (ANNUAL MAINTENANCE CONTRACTS)

Our trained team conducts detailed inspections that comply with government regulations and organizational standards. We don't just identify issues — we offer recommendations and solutions to rectify them, keeping your systems running at their best and maximizing their lifespan and effectiveness.

NOC CONSULTANCY

Regulatory requirements can be overwhelming, but SFPL is here to help you navigate them. We provide expert consultancy to simplify the entire process — from system installation to liaising with government departments — ensuring all requirements are met seamlessly and giving you complete peace of mind.

FIRE SAFETY IS NEVER AN ACCIDENT; IT'S A RESULT OF THOUGHTFUL PLANNING AND VIGILANT IMPLEMENTATION OF EFFECTIVE SYSTEMS.

Quality Policy

1 High standards of service in the field of fire detection and fire protection, electrical, plumbing and CCTV systems.

2 Quality inspection to ensure all materials, machines and equipment used in each project meet our standards.

3 High customer satisfaction through the quality products and services offered by the company.

4 Verifying and validating both existing and new programs.

5 Continued research on the improvement of the quality of our products and services.

6 Regular internal quality audits and management reviews for ongoing evaluation and improvement of our quality system.

7 Professionalism in the work environment — at the office or on site — ensuring quality procedures are well communicated.

Safety Policy

1 A safe workplace — the organization's environment, facilities, equipment and substances are subject to safe systems of work to prevent risks to health or safety.

2 Defensive driving techniques ensured for car drivers and machinery operators.

3 Safety as a line-management responsibility at every level of the organization.

4 Personal responsibility promoted to prevent health hazards and injuries — cooperating with the organization to comply with its duties, requirements and statutory obligations.

5 Monitoring the effectiveness of the safety policy.
